VERTIGO
MIPS HELMET

Do you want to take your riding to the next level?

Then it will involve a lot of risks where you need a helmet with that "little extra" when it comes to safety. AMOQ Vertigo is developed in a close collaboration with the company MIPS, which is the world-leader in Brain Protection Systems for helmets, which minimizes the risk of concussions. In addition to the fantastic MIPS system, this helmet has a very comfortable premium interior, which works great as for both motocross and snowmobiling. The shell has an aerodynamic shape and is adapted for your goggles to be in place no matter how hard you ride. The interior is of course removable and can be easily washed in the washing machine. The ventilation is large enough at the back so that the heat is effectively ventilated out, but without making the helmet too cold during the winter.

We asked ourselves; How do we make the best possible snowcross clothing? The answer was easy.

In racing it is all about small margins, from starting line to finish line. Because of that we have been testing our gear properly together with one of the biggest snowcross teams in Finland, Loukko.com Racing Team, during the 2020-21 season with great result. We are of course super proud of this partnership and we can with confidence say these products really works in reality, not just in a testing facility.

For season 2022, we can finally introduce these products to the market.
